

PEX Pipe Fittings

PRODUCT INTRODUCTION

PEX plumbing pipe is a term that refers to cross-linked polyethylene. It is a form of flexible plumbing tubing used for both hot and cold water supply lines. Thanks to its flexibility and ease of connection, PEX is gradually becoming the preferred pipe for residential and commercial uses.

PEX plumbing pipe is a term that refers to cross-linked polyethylene. It is a form of flexible plumbing tubing used for both hot and cold water supply lines. Thanks to its flexibility and ease of connection, PEX is gradually becoming the preferred pipe for residential and commercial uses.

FEATURES OF PRODUCT

- **Good material**
  Good stability and long-term pressure resistance: good material property, stable performance, good thermal creep resistance, aging resistance, long service life, non-toxic and harmless.
- **Good stability and safety**
  Long term pressure resistance, high safety, low temperature embrittlement temperature up to 70 degrees, can be transported in low temperature environment, construction, aging resistance.
- **Long service life**
  The temperature is 70 ℃, the pressure is 0.8MPa, and it can be used safely for more than 50 years. It can pass the test of anti zinc orrosion, and has a longer life than ordinary pipe fittings in malignant environment, and it is more difficult to leak water.
- **Excellent performance**
  Solid brass structure has excellent properties, which can resist corrosion and mineral accumulation, rust and frost damage. Suitable for new or modified structures and hot or cold water distribution.
- **Easy to install**
  Smooth thread will reduce the resistance in the installation process, save time and improve efficiency. It is easy to install with PEX clamping tool without flame, flux or solder, adhesive, glue or solvent.

Application:

Suitable for pipe connections, such as， push copper pipe, PE-RT, PEX, CPVC or brass pipe.
Pex fitting can be used for the connection of the household floor heating pipe and the water pipe. It Can also be used for aluminum-plastic composite pipe connection, gas pipe connection.
